Annual Index for Volume 18

Author Index

	No.-Page
Adamson, H. P.	1-57
Agar, J.	1- 9
Arick, J.	2-79
Arnold, J. E.	4-57
Arzbaecher, R. C.	1-95
Andreasen, C. C.	1-71
Beans, T. R.	2-21
Beaverstock, M. C.	2-91
Beddoes, M. P.	4- 9
Bernard, J. W.	2-91
Bittman, G. V.	2-65
Blanks, J. P.	3-55
Carfagno, S. P.	2-31
Cermak, J. E.	4-23
Cheung, T. F.	2-73
Cho, C. H.	1-71
Coleman, T. G.	3-65
Collins, S. M.	1-95
Denton, R. A.	3-13
Edgar, T. F.	4-67
Evans, L. B.	2-91
Flax, S. W.	2-79
Foster, T. F.	4-57
Gibson, R. J.	2-31
Goodrich, L. D.	4-43
Griffin, D. E.	1-23
Grillo, P. H.	1-33
Haberman, L. K.	2-21
Haut, R. C.	4-15
Henderson, G. R.	3-35
Histand, M. B.	1-57
Hoyt, M.	1-15
Jansen, J. H.	1-87
Japenga, R. J.	4-75
Jeevanandam, T.	1-81
Jones, J. R.	3-89
Kareem, A.	4-23
Kayton, M.	2- 3
Kinginger, J. H.	2- 3
Klein, W. F.	1-63
Krug, D. A.	2-79
Lalor, M. J.	3-89
Lamba, S. S.	1-81
Lassahn, G. D.	4-43
Long, A. B.	2- 3
Luyben, W. L.	2-73
Mark, A.	3- 3
May, D. L.	1-71
Meyer, W. W.	4-15
Miller, T.	2-59
Norden, B. N.	1-71
Nyquist, G. W.	3-13
Ochiai, S.	1-49
Painter, J. H.	2-43
Parsons, J. R.	1-23
Pottle, C.	3-81
Prodell, A. G.	3-41
Rao, D. S.	1-81
Rathkey, J. H.	2-79
Reeves, J. T.	1-57
Remmers, E. P.	4-15
Rolinski, E. J.	4-57
Server, W. L.	3-35
Shaeffer, J. F.	2-43
Shunta, J. P.	1-63
Smith, D. E.	1-23
Sodal, I. E.	1-57
Soh, W. K.	1-41
Starr, C. D.	4-83
Stephanou, H. E.	3-101
Suarez, L.	1- 3
Thalhammer, E. D.	4- 3
Thoi, N. Q.	1-41
Treaster, A. L.	3-23
Updike, O. L.	3-75
Wang, T. P.	4-83
Ward, T. J.	2-65
Webb, D.	4-67
Wells, M. K.	1-57
Weston, W.	3-89
Womack, B. F.	3-55
Wright, H.	2-87
Yocum, A. M.	2-23
Zdzieborski, J. H. G.	2- 3

Subject Index

	No.-Page
Analyzers	
Air, infrared ambient	1- 3
Boiling point for refineries/ petrochemical	1-33
Automation	
Economics, modeling. forecasting	2-91
Biomechanics	
Leg load transducers	3-13
Biomedical	
Computer control, arrhythmias	1-95
Cybernetics, brain theory, advanced algorithms	3-55
Microprocessors	2-79
Prosthetic control	3-75
Ultrasound, blood flow, Doppler meters	1-57
Whole-body mathematical model	3-65
Boilers	
Chemicals and heat recovery	1-87
Control	2-21
Chemical processes	
Chemicals/heat recovery boiler	1-87
On-stream boiling point analyzers	1-33
Structural analysis control	2-65
Chromatographs	
Ion-chromatography for energy	2-59
Microcomputers	1-23
Compressors	
Chiller optimization	1-71
Computers	
Biomedical	1-63
Burner control	2-21
Chilled water generation system	1-81
Control (solar experiment)	4- 3
Digital control	1-63
Glass forming	4-75
Holography	4- 9
Interfacing	1-81
Process Chromatographs	1-23
Software	3-81, 4-15
Control	
Boiler, burner (advanced)	2-21
Boiling point, refinery/ petrochemical process streams (advanced)	1-33
Chemical processes	2-65
Computer (for solar experiment)	4- 3
Decoupling, model reductions, (advanced techniques)	4-67
Distillation column, filters, constraint	1-49
Flow, electrohydraulic system, laser velocimeter feedback	3-89
Fractionators/distillation	1-23
Microprocessors, multi-variable, digital (advanced techniques)	1-63
Multivariable decoupling	2-65
Proportional lag (advanced techniques)	2-73
Sensors (biomedical)	3-75
Data acquisition	
Biomedical, special education	2-79
Energy	
Instrumentation, material fracture energy	3-35
On-stream ion chromatography	2-59
Solar thermal energy	4- 3
Holography	
Iteration technique	4- 9
Interfaces	
Computer	1-81
Density meter	1- 9
Liquids in pipelines	1-9, 15
Measurement	
Energy, material fracture	3-35
Flow sensor, averaging technique	1-41
Flow, two-phase, turbine, drag disc, densitometer, velocity and density profile	4-43
Porosity measuring system, capacitance probe	1-81
Pressure, transducer/ telemetry	3- 3
Pressure, velocity, Reynolds, wall effects	3-23
Strain accelerometer	2-87
Metrology	
High-power, incident flux laser profiling, null point calorimetry	4-57
Microprocessors	
Burner control	2-21
Nuclear	
Qualification of safety systems	2-31
Pattern recognition	
Well logs, segmentation, syntactic	3-101
Power	
Remote multiplexing	2- 3
Simulation on vector and parallel processors	3-81
Reentry vehicle ground testing	
Arc heaters, simulation and hyperthermal testing	2-43
Safety	
Instrument qualification, accelerated aging	2-31
Sensors	
Biomedical, for externally closed loops	3-75
Superconductivity	
Magnets	3-41
Thermocouples	
Nicrosil-Nisil	4-83
Wind-Tunnel Tests	
Wind effects on structures	4-23

Title Index

No. 1 **Page**

A Multicomponent, Multipoint Infrared Ambient Air Monitor 3
The Use of the Differential Density Converter for Interface Detection 9
Development in Sonic Interface Detection 15
The Use of Process Analyzers for Composition Control of Fractionators 23
Practical Boiling Point Analyzer Applications 33
On the Averaging Technique and the Discharge Coefficient of the Annular-Averaging Flow Sensor 41
Rate-Limiting Filter with Linear Zone and Its Application to Distillation Column Control 49
Ultrasonic Transesophageal Measurement of Hemodynamic Parameters in Humans 57
Microcomputer Digital Control – What It Ought to Do 63
Optimizing Plant Refrigeration Costs 71
Measurement of Bed Porosity in Liquid Fluidized Beds 81
Operation Parameters of a Black Liquor Chemicals and Heat Recovery Boiler 87
Feedback Control in the Management of Cardiac Arrhythmias 95

No. 2

Study of Remote Multiplexing for Power Plant Applications 3
Advanced Burner Control System 21
Developments in the Qualification of Safety-Related Instruments 31
High Performance Arc Heater Design 43
On-Stream Ion Chromatography: An Aid to Energy Conservation 59
Structural Analysis Control: An Evaporator Application 65
A Further Study of the PL Level Controller 73
A Microprocessor-Based Aid for Training Autistic Children 79
A Midband Strain Sensitivity Test Device 87
Economic Modeling of Process Management and Control Systems 91

Title Index (cont.)

No. 3 **Page**

Pressure Measurements on a Spinning Wind-Tunnel Model by Means of Telemetry 3
Crash Test Dummy Lower Leg Instrumentation for Axial Force and Bending Moment 13
The Calibration and Application of Five-Hole Probes 23
An Optical System for Measurement of Energy for Pendulum Impact Machines 35
Superconducting Magnets in High Energy Physics 41
New Control Algorithms via Brain Theory 55
A New Mathematical Model of the Human Body in Health, Disease, and during Treatment 65
Control Sensors for Biomedical Systems 75
Solution of Sparse Linear Equations Arising from Power System Simulation on Vector and Parallel Processors 81
Optimal Design of an Electrohydraulic Flow Control System Using Laser Velocimeter Feedback 89
Multilevel Syntax Analysis for Geological Data Compression 101

No. 4

Real-Time Computer of Five Megawatts of Solar Thermal Energy 3
A New Method for Constructing a Hologram from X-ray Views of Acoustic Ray Views 9
A Numerical Method of Film Analysis with Differentiation 15
Wind-Tunnel Simulation of Wind-Structure Interactions 23
Mass Flow Instrumentation Performance during LOFT Nonnuclear Test Series 43
A New Approach to Laser Beam Heat Flux and Power Profiling 57
Decoupling Controller Simplification via Model Reduction 67
Computer-Controlled Glass Forming: Past, Present and Future 75
Nicrosil-Nisil Thermocouples in Production Furnaces in the 538 °C (1,000 °F) to 1,177 °C (2,150 °F) Range 83
